EXPERIENCE

Senior Business Intelligence Data Engineer

Meta

📅 01/2018 - Present 📍 New York

- Managed 3 cross-functional teams to work in close collaboration with analytics, engineering, and stakeholders
- Directed day-to-day operations of data-dependent systems
- Ensured 100% of data was processed and transferred on time
- Processed, manipulated, stored, and parsed data in 6+ data pipelines
- Designed, developed, deployed, and maintained data services for 20+ pipelines
- Developed 15 pages of best practice documentation with approaches to support continuous process automation for data ingestion and data pipeline workflow
- Created and presented reports, analyses, and presentations to 9 stakeholders, including executives

Mid-Level Business Intelligence Data Engineer

Discord

📅 09/2016 - 01/2018 📍 New York

- Performed source system analysis, data profiling, and design mapping logic between source systems and 3 data warehouses
- Created data extraction, cleansing, and load programs to move data from source systems to 3 data warehouses
- Worked with 5,000+ customers, end-users, technical analysts, and application designers to define data requirements
- Designed and developed data requirements for 12+ Business Intelligence (BI) applications

Junior BI Data Engineer

Hulu

📅 06/2014 - 08/2016 📍 New York

- Collected and analyzed system operational information for capacity and planning purposes
- Led design, initial installation, configuration, daily operation, and user support of 60% of business intelligence environments
- Organized system security, user provisioning, and license compliance for 3 data engineering teams
- Provided support to 10,000+ end-users for application connectivity and product usage

SUMMARY

Data-driven problem solver with 8+ years of experience building and maintaining business intelligence solutions. Proven ability to transform raw data into actionable insights that drive business growth. Expertise in data warehousing, data modeling, ETL/ELT pipelines, and BI tools (Tableau, Power BI). Strong analytical and communication skills, adept at collaborating with stakeholders to translate business needs into technical solutions.
