# SENIOR DATA SCIENTIST

#### **Senior Data Scientist**

@ tcoleman@email.com

¿ LinkedIn/Portfolio

## **SUMMARY**

With 8 years of experience in the domain of data science and analytics, I bring a proven knowledge of complex problem solving, machine learning, and strategic data analytics. Standout achievements include developing a predictive ad model and implementing a real-time analytics platform.

## **EXPERIENCE**

#### 10/2018 - Present •

## Senior Data Scientist

Location

## **Best Buy**

- Remote Led data extraction and evaluation efforts to save Best Buy more than 11M over the course of tenure
- Partnered with product team to build production recommendation engine in Python that improved average length on page and resulted in \$450K in incremental annual revenue
- Created a customer attrition random forest model, improving monthly retention by 6 basis points for customers likely to attrit by servicing relevant product features for them
- · Communicated with PMs to lead 4 data scientists in project planning
- · Coached data team throughout short and long-term projects

#### 04/2014 - 10/2018

#### Data Scientist

Location

#### **ABC Company**

- · Conducted A/B testing to solve client pain points in learning platforms, and identified and recommended solutions to solve unclear platform roadmaps to reduce bounce rate by 62%
- · Extracted data from 7 disparate sources, and increased agility and accuracy with a centralized system
- · Constructed decisions trees to optimize needed algorithms to better target the learning audience by

#### 04/2012 - 04/2014

## Data Analyst

Brooklyn NY

#### **2U**

- · Determined, using Python clustering methods, groups of states where underwriting models were underperforming, and owned improvements to increase profit by 4%
- · Identified procedural areas of improvement via customer data to help improve profitability of a nationwide retention program by 8%
- Developed and owned the reporting for a nationwide retention program using Python, SQL, and Excel, saving an average of 60 hours of labor each month

## **SKILLS**

A/B Testing	Algorithms	Clustering	Customer Se	gmentation	Data Extraction	ElasticSearch
EXCEL flask	Mathema	tics MySQL	Numpy	Pandas	predictive modeling	Python
Random Fores	t RedShift	SAS Scil	kit Scikit-Le	arn SQL		

## **EDUCATION**

04/2014

Master's in Mathematics
University of Pittsburgh

04/2012

Bachelor's in Mathematics and Economics
University of Pittsburgh
